DETAILED ACTION

1. This Office action is in response to Application No. 09/834,175, filed on 4/12/2001.

2. Claims 1-17 are pending.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-17 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Baseman et al. (U.S. Pat. No. 6,671,673) in view of O'Connor et al (U.S. Pat. No. 6,067,537).

As per claims 1, 2, 7-10 and 14-17 Baseman substantially discloses a method to generate a strategic business plan to improve operations, and to closely monitor various performance measures of an enterprise, comprising the steps of:

An entrepreneurial and venture capital community resource and collaboration center and portal for venture incubation and acceleration, the system is provided by the use of a local computer terminal that accesses via intranet/internet (see., abstract, col 5, lines 56-65, col 8, lines 4-67, col 9, lines 5-63).

Baseman fails to explicitly disclose a web application. O'Connor discloses a web

development tools for creating dynamic web application (see., abstract, col 4- col 136).

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the teaching of Baseman by including a web application as taught by O'Connor because this would perform scenario planning for the application that the business simulation is targeted for.

As per claims 3, 4-6 and 11-13 Baseman discloses the claimed of enhancing their business through interactive predefined business planning and operational/management tools, needs posting system, knowledge-base, collaboration, and with proactive electronic alerts (see., abstract, specifically strategic business plan).
